Surface preparation: Preparing the surface well for installation can determine the life of the wallcovering. This is why we recommend the use of Asian Paints Sealer as a primer coat- it seals the surface well and prepares it for the adhesive coat.

Adhesive: The Nilaya wallcovering adhesive has been specially designed by us to perform well in Indian conditions. It is water based, ready to use and works with a variety of substrates. Moreover, it has anti-microbial properties and zero VOC, making it the perfect choice for all installations.

World class installation tools: Nilaya offers a range of specially chosen tools to ensure accurate measurement, clean and precise cutting and seamless application. This is available as a complete tool kit to all our trained Nilaya Applicators. In case the installation is being executed by your contractors, we recommend that they use the Nilaya tool kit for best results.

Trained installers: Our team of applicators have many years of experience in the industry and have been trained by US and UK based specialists. We can also train your installation team so that they are able to deliver the site on time and as per your expectations.
